Epic Link:	Quadratec																											
Scope, Objectives, and Risks:	Testing Quadratec to try and improve the usability and functionality of the website Testing the sign up, login and account features, searching for items (by vehicle, in search bar, and others), selecting item(s) and adding it to the cart. Also doing a quick spot check for possible broken links to items or external pages.																											
Overall Approach:	I first want to look at this sites functionality, can a user select and buy an item, can they sign up and login, ect. After I want to look at it for usability, and design, does it look and feel right from a users perspective. The majority of testing will be done manually, but automation will be written to facilitate future testing.																											
What, Who, How?:	<div><div><div>1. Sign up and login</div><div>2. account features</div><div>3. searching for items</div><div>4. adding items to cart</div></div><div>Testing will be done by Jake Wretberg, he will be looking at functionality and usability of the site as a whole. No set requirements have been written so testing will be mostly experience based with manual testing. After which Automation will be written to help speed up the process in the future.</div><div>the website will be tested using Chrome Version 71.0.3578.98</div></div>																											
Schedule:	After the approval of this test case (proposal), test cases will be written to cover the objectives listed above. After that manual testing will begin, with any bugs found being reported in Jira. once manual testing is complete automation will be written to help with maintainability of the site. Testing and automation will begin 12/20/2018, and must be finished by 01/03/2019. Entry criteria <ul style="list-style-type: none">• Final project proposal has been accepted.• Budget is in place.• Due date is established.																											

	Exit criteria <ul style="list-style-type: none"> all test cases have been run. all bugs have been reported. automation has been written.
Monitoring and Control Metrics:	Test cases/suites, bugs, and test summaries are to be reported/tracked using Jira linking all documents together.
Budget:	No one gave me any money, should I be doing this?
Test Documentation Guidelines:	Standard JIRA test cases will be used, but they can be kept quite high level. <ul style="list-style-type: none"> Link all test cases to this test plan. *All bugs need to have a test case linked. Create a new test case and update test plan as necessary if bugs are found and there is not a test case currently covering that issue.

Original Estimate:	Not Specified		
Issue links:	Relates relates to Q9J-54 Testing account features on Quadrtec. Retired relates to Q9J-51 Quadrtec.com test plan In Progress		
Epic Link:	Quadrtec		
Test Preconditions:	<ul style="list-style-type: none"> Test plan has been accepted. Access to a valid email account. Budget and Due date are set. 		
Test Script:	1. Go to quadrtec 2. Click on "My Account" in the top right corner.		

	<ol style="list-style-type: none"> Click on "Register" in the drop down menu Enter in a invalid email and create a password and try to sign up and log in. Start over at step one but register using "ripsterbolton@gmail.com" password for that email is "streetsharks!" Try to login without verifying email. Verify email. Login with valid email but invalid password
Test Postconditions:	<ol style="list-style-type: none"> I should not be able to complete "Register" process with a invalid email or password. I should need to verify my email before being able to log in. I should have a new account created, and be logged in to the "account" page. All bugs and issues should be reported in Jira

Description

Quadrateg

Testing to see if:

- I can sign up for a new account with a invalid email account(missing "@" or other errors).
- I can sign up using a valid email.
- If I need to validate my email.
- What kind of characters are allowed for my password.

Epic Link:	Quadrateg		
Test Preconditions:	<ol style="list-style-type: none"> Have a valid account set up <ul style="list-style-type: none"> Email: ripsterbolton@gmail.com Password: streetsharks1! 		

	1. log in
Test Script:	<ol style="list-style-type: none"> 1. Log in to Quadratic. 2. Find any item on site and add it to wish list. 3. check "Account Settings", "Order History", "Wish List", and "Rate Your Products" functions.
Test Postconditions:	<ol style="list-style-type: none"> 1. Account settings should allow you to edit name and passwords, but should require input of old password to verify. 2. Order history should just be present (I don't want to order anything off the site using my own money). 3. Wish list should contain the item we added it earlier and be able to add to cart. 4. Rate you product should not allow us to review anything that has not been purchased using this account. 5. All bugs and design flaws should be reported.

Description

Testing to see that after I am logged in:

1. Edit my name and password in account settings.
2. Can I view my order history (no history will be present).
3. Can I add items to and view my wish list and to cart.
4. Can I review products (should only be able to edit if item has been purchased).

Issue links:	Relates relates to Q9J-51 Quadratic.com test plan In Progress
Epic Link:	Quadratic
Test Preconditions:	<ul style="list-style-type: none"> • Quadratic • Test plan has been accepted. • Access to a valid email account. • Budget and Due date are in place
Test Script:	<ol style="list-style-type: none"> 1. Go on to the Quadratic website and search for items using search bar and search tabs. 2. Verify that results match to what was searched for. 3. Try using different types of characters (Chinese characters, \$^*) in the search bar and see what comes up. 4. select an Item, change quantity, and add it to wishlist (must be signed in).

Test Postconditions:	<ol style="list-style-type: none"> 1. All Items should be relevant to search terms. 2. Any errors received should help user to correct search terms. 3. Any bugs should be reported in Jira.
-----------------------------	---

Description

I should be able to search for Items by using the search bar or by "Category", "Brand", "Type of Jeep", "New & Hot Items", and "Special Offers".

Resulting items should be relevant to the manner they were searched.

Original Estimate:	Not Specified		
Environment:	Google Chrome Version 71.0.3578.98. MacOS Mojave version 10.14.2		

Issue links:	Relates relates to Q9J-58 retesting for quantity option on prod... Open relates to Q9J-51 Quadratec.com test plan In Progress relates to Q9J-54 Testing account features on Quadratec. Retired relates to Q9J-56 Checking out Retired		
Steps to Reproduce:	1. Go to Quadratec . 2. Click on any product. 3. Before adding to cart look for a "Quantity" option (should be there but isn't).		
Expected Result:	Customer can edit quantity to be ordered from both the product page and from the cart.		
Actual Result:	customer can only edit quantity from the cart,		
Epic Link:	Quadratec		

Description

There is no quantity select option available on the product page. quantity can be edited in cart but that might not lead to the best user experience.
